

Online!

Differential analysis of quantitative proteomics data using R

You will learn...

- how to use the popular statistical programming language R for your daily analyses
- about the statistical methods applied in differential analyses (presented methods also apply to other omics data).

Topics

- Basic **introduction to R** usage
- **t-test**: Background on statistical inference
- Differential analysis of high-throughput data and candidate selection: **multiple testing, volcano plot**

Date	Monday, 2nd Nov 2020 , 10:00 a.m. – 6:00 p.m.
Venue	Online training event!
Further Details	http://www.denbi.de/training
Registration	http://goo.gl/forms/mpKHnbT1Um
Requirements	Computer, headset, camera, stable internet connection
Fee	This course is for free!
Contact	bioinfoservice@rub.de
